DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after first rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/3/2006 has been entered.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "inner sleeve-like openings" as recited in line 7 of claim 31 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.
3. The drawings are objected to because there is no description an item having no shade between the disk (20C) and the spindle (34C) as shown in Fig. 4. According to the specification, the balancing weight (46C) is provided at a location on the outer surface of spindle 34 (see lines 6-7 on page 5). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must

be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: There are no such descriptions for the items "32A" as shown in Fig. 2, "32B" as shown in Fig. 3 and "32C" as shown in Fig. 4 in the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and

informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

5. Claims 31-33, 48 and 49 are objected to because of the following informalities:

Re. Claim 31: Before the phrase "have an inner diameter surface" as recited in line 11, the word "each" is needed to be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 31-33, 48 and 49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re. Claim 31: The limitation "inner sleeve-like opening" as recited in line 7 renders vague and indefinite. It is unclear as to what the inner sleeve-like opening is meant. Clarification is required.

The limitation "wherein at least two of the disks each have an inner diameter surface that forms at least two lateral protrusions that protrude radially inward the spindle; and biasing.... apex portions of the at least two lateral protrusions contact an outer diameter surface of the spindle" as recited in lines 10-15 renders the claim vague and indefinite. According to Fig. 4, the weight 46C is provided at a location on the

Art Unit: 3729

outer surface of spindle 34C (see lines 6-7 on page 5 of the specification). Therefore, the apex portions of the at least two lateral protrusions formed on the inner diameter surface of the disks are embedded in the spindle, not contact an outer diameter surface of the spindle.

Allowable Subject Matter

8. Claims 31-33, 48 and 49 are would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
